

Organic Flowers

Catalog

We grow flowers in harmony with the environment.

Flowers not only beautify our homes but also play a vital role in a healthy ecosystem. In our cultivation, we focus on practicing ethics and sustainability, mimicking natural processes without the need for chemical products. We offer a wide variety of annual and perennial plants, which allows us to create permanent habitats for various species of pollinators and birds throughout the year.

We believe that the flowers that decorate your home should be as fresh and ecological as the food you consume. That is why we diversify our offering according to the different seasons of the year, offering freshly harvested and sustainably grown flowers.

We work directly with florists, minimizing emissions produced by long supply chains. This way, we can offer fresh, sustainable, and high-quality flowers without impacting the environment.

Lilium bulbiferum L.

Catalog 2023
